

ST-GEORGES

Platinum & Base Metals Ltd.

An exploration stage company

Audited Financial Statements

For the years ended December 31, 2013 and 2012

(Expressed in Canadian Dollars)

The accompanying notes are an integral part of these financial statements.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying financial statements of St-Georges Platinum and Base Metals Ltd. ("St-Georges" or the "Company") were prepared by management in accordance with the International Financial Reporting Standards ("IFRS"). Management acknowledges responsibility for the preparation and presentation of the financial statements, including responsibility for significant accounting judgements and estimates and the choice of accounting principles and methods that are appropriate to the Company's circumstances. The significant accounting policies of the Company are summarized in Notes 2 and 3 to the financial statements.

Management has established systems of internal control over the financial reporting process, which are designed to provide reasonable assurance that relevant and reliable financial information is produced.

Guimond Lavallée Inc., the Company's independent auditors, conducted an audit of the financial statements in accordance with Canadian generally accepted auditing standards. Their audit included an examination, on a test basis, of evidence supporting the amounts and disclosures in the financial statements. As well, they made an assessment of the accounting principles used and significant estimates made by management, and they evaluated the overall financial statement presentation.

The Board of Directors of the Company is responsible for reviewing and approving the financial statements and for ensuring that management fulfills its financial reporting responsibilities. An Audit Committee assists the Board of Directors in fulfilling this responsibility. A majority of the members of the Audit Committee are independent. The Audit Committee meets with management to review the internal controls over the financial reporting process, the financial statements and the auditors' report. The Audit Committee also reviews the Company's Management's Discussion and Analysis to ensure that the financial information reported therein is consistent with the information presented in the financial statements. The Audit Committee reports its findings to the Board of Directors for its consideration in approving the financial statements for issuance to the shareholders.

Management recognizes its responsibility for conducting the Company's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

INDEPENDENT AUDITOR'S REPORT

To the shareholders of ST-GEORGES PLATINUM AND BASE METALS LTD.

We have audited the accompanying financial statements of ST-GEORGES PLATINUM AND BASE METALS LTD., which comprise the statements of financial position as at December 31, 2013 and December 31, 2012, and the statements of comprehensive loss, statement of changes in equity and statements of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards (IFRS), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of ST-GEORGES PLATINUM AND BASE METALS LTD. as at December 31, 2013 and December 31, 2012, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS).

Emphasis of matter

Without qualifying our opinion, we draw attention to note 1 in the financial statements which describes matters and conditions that indicate the existence of a material uncertainty that may cast substantial doubt about ST-GEORGES PLATINUM AND BASE METALS LTD.'s ability to continue as a going concern. The directors have a reasonable expectation that the Company will be able to obtain necessary funding to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the financial statements.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

1. Corporate Information and Going Concern of Operations

St-Georges Platinum & Base Metals Ltd. (the “Company” or “St-Georges”) was incorporated under the Canada Business Corporations Act on June 21, 2002. The Company is listed on the Canadian National Stock Exchange (“CNSX”), having the symbol SX, and on the OTCQX, having the symbol SXOOF. The address of the Company’s corporate office and principal place of business is 630 Sherbrooke Street West, Suite 410, Montreal, Quebec, H3A 1E4, Canada. The principal activities of the Company are the exploration and evaluation of mineral properties in Canada. The Company, which is in the process of exploring its mineral properties, has one reportable segment in Canada and all of the assets are located in Canada.

The financial statements have been prepared on a going concern basis, which contemplates continuity of normal business activities and the realization of assets and discharge of liabilities in the normal course of business. At December 31, 2013, the Company has not yet achieved profitable operations, had no operating income and had cash and cash equivalents of \$707 and negative working capital of \$469,359. As such, the Company’s ability to continue as a going concern depends on its ability to successfully raise additional financing. If additional capital is not raised, the going concern basis may not be appropriate with the result that the Company may have to realize its assets and extinguish its liabilities other than in the ordinary course of business, and at amounts different from those stated in the financial information. No adjustments for such circumstances have been made in the financial information.

2. Basis of Presentation

The recoverability of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, continuation of the Company’s interest in the underlying resource claims, the ability of the Company to obtain necessary financing to complete their development and upon future profitable production or proceeds from the disposition thereof. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be available on acceptable terms.

a) Statement of Compliance

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“ISAB”).

The significant accounting policies applied in these financial statements are presented in Note 3 and are based on IFRS effective as at December 31, 2013.

The financial statements of the Company were authorized for issue by the Board of Directors on April 30, 2014.

b) Basis of Measurement

The financial statements have been prepared on an historical cost basis.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012
(Audited)

2. Basis of Presentation (continued)

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. The areas involving a higher degree of judgement of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

c) Functional and Presentation Currency

The financial statements are presented in Canadian dollars, which is also the Company's functional currency.

3. Summary of Significant Accounting Policies

The accounting policies set out below have been applied consistently to all years presented in these financial statements. Refer to section (p) which addresses standards issued but not yet effective.

a) Mining Properties and Deferred Exploration and Evaluation Expenditures

Pre-exploration Costs

Pre-exploration costs are expensed in the year in which they are incurred.

Exploration and Evaluation Expenditures

Once the legal right to explore a property has been acquired, costs directly related to exploration and evaluation expenditures ("E&E") are recognized and capitalized, in addition to the acquisition costs. These direct expenditures include such costs as materials used, surveying costs, drilling costs, payments made to contractors and depreciation on plant and equipment during the exploration phase. Costs not directly attributable to exploration and evaluation activities, including general administrative overhead costs, are expensed in the year in which they occur. Tax credits and mining duties are applied to reduce related E&E in the period recognized.

The Company may occasionally enter into farm-out arrangements, whereby the Company will transfer part of a mineral interest, as consideration, for an agreement by the transferee to meet certain exploration and evaluation expenditures which would have otherwise been undertaken by the Company. The Company does not record any expenditures made by the farmee on its behalf. Any cash consideration received from the agreement is credited against the costs previously capitalized to the mineral interest given up by the Company, with any excess cash accounted for as a gain on disposal.

When a project is deemed to no longer have commercially viable prospects to the Company, exploration and evaluation expenditures in respect of that project are deemed to be impaired. As a result, those exploration and evaluation expenditure costs, in excess of estimated recoveries, are written off to the statement of comprehensive loss/income.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

The Company assesses exploration and evaluation assets for impairment when facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Once the technical feasibility and commercial viability of extracting the mineral resource has been determined, the property is considered to be a mine under development and is classified as 'mines under construction'. Exploration and evaluation assets are also tested for impairment before the assets are transferred to development properties.

Mining exploration and evaluation expenditures are classified as intangible assets.

b) Impairment of Non-Financial Assets

Impairment tests on intangible assets with indefinite useful economic lives are undertaken annually at the financial year-end. Other non-financial assets, including exploration and evaluation assets, are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less costs to sell, the asset is written down accordingly.

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets.

An impairment loss is charged to profit or loss, except to the extent they reverse gains previously recognized in accumulated other comprehensive loss/income.

c) Financial Instruments

Financial Assets

Financial assets are classified into one of the following categories based on the purpose for which the asset was acquired. All transactions related to financial instruments are recorded on a trade date basis. The Company's accounting policy for each category is as follows:

Financial assets at fair value through profit or loss ("FVTPL")

A financial asset is classified at fair value through profit or loss if it is classified as held for trading or is designated as such upon initial recognition. Financial assets are designated as at FVTPL if the Company manages such investments and makes purchase and sale decisions based on their fair value in accordance with the Company's risk management strategy. Attributable transaction costs are recognized in profit or loss when incurred. FVPTL are measured at fair value, and changes, are recognized in profit or loss. There are no financial assets classified in this category.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

Held to Maturity ("HTM")

Securities that have a fixed maturity date and which the Company has positive intention and the ability to hold to maturity are classified as held-to-maturity and are initially recognized at fair value and subsequently at amortized cost using the effective interest rate method. Transaction costs incurred to acquire held to maturity financial instruments are included in the underlying balance. There are no financial assets classified in this category.

Loans and Receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or issue and subsequently carried at amortized cost, using the effective interest rate method, less any impairment losses. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process. The Company has classified cash and cash equivalents, and other receivables as loans and receivables.

Available-For-Sale Investments

Non-derivative financial assets that do not meet the definition of loans and receivables are classified as available-for-sale and comprise principally the Company's strategic investments in entities not qualifying as subsidiaries or associates. Available-for-sale investments are carried at fair value with changes in fair value recognized in other comprehensive loss/income. Where there is a significant or prolonged decline in the fair value of an available-for-sale financial asset (which constitutes objective evidence of impairment), the full amount of the impairment, including any amount previously recognized in other comprehensive loss/income, is recognized in profit or loss. If there is no quoted market price in an active market and fair value cannot be readily determined, available-for-sale investments are carried at cost. There are no financial assets in this category.

On sale or impairment, the cumulative amount recognized in other comprehensive loss/income is reclassified from accumulated other comprehensive loss/income to profit or loss.

Effective interest method

The effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period. The effective interest rate is the rate that discounts estimated future cash receipts over the expected life of the financial asset, or, where appropriate, a shorter period, to the net carrying amount on initial recognition. Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as FVTPL.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012
(Audited)

3. Summary of Significant Accounting Policies (continued)

Impairment of Financial Assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the reversal of the previously recognized impairment loss is recognized in the statement of loss and comprehensive loss.

Financial Liabilities

Financial Liabilities are classified into one of following categories:

Fair Value through profit or loss

This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with the changes in fair value recognized in the statement of loss and comprehensive loss. There are no financial liabilities in this category.

Other financial liabilities

Financial liabilities are classified as other financial liabilities, based on the purpose for which the liability was incurred, and comprise of trade payables and accrued liabilities. These liabilities are initially recognized at fair value net of any transaction costs directly attributable to the issuance of the instrument and subsequently carried at amortized cost using the effective interest rate method. This ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried in the statement of financial position. Interest expense in this context includes initial transaction costs and premiums payable on redemption, as well as any interest or coupon payable while the liability is outstanding. This category includes accounts payable and accrued liabilities, due to a company controlled by a director and convertible debentures.

Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or expired.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

d) Compound financial instruments

Compound financial instruments issued by the Company comprise convertible debentures that can be converted into shares include both a financial liability and an equity component, such as the option to convert debentures in shares. The components of the instrument are classified separately as liabilities and equity. The Company first determines the carrying amount of financial liability by discounting future cash flows representing principal payments and interest payments generally at market rate for a similar liability which no equity component is associated to. The carrying value of the equity instrument that represents the convertible in share option is then determined by deducting the carrying amount of financial liability in the amount of the hybrid instrument as a whole.

e) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash in trust, deposits with banks and other highly liquid short-term investments with original maturities of three months or less.

f) Tax Credits and Mining Duties

The Government of Quebec provides a 16% non-taxable refundable credit for losses to help operators meet exploration, mineral deposit evaluation and mine development costs by refunding part of eligible expenditures incurred. This credit is based on the lesser of:

- The amount of the annual loss; and
- 50% of eligible exploration expenditures, mineral deposit evaluation and mine development expenses, reduced by tax credits related to resources.

The Government of Quebec also offers businesses having establishments and that carry on activities in Quebec a refundable tax credit of 35% on eligible exploration expenses.

Tax credits and mining duties, which are earned as a result of qualifying mineral exploration expenses, are recognized when the exploration expenses are incurred and collection is reasonably assured. They are applied to reduce related mineral exploration expense in the period recognized.

g) Income Taxes

Income tax expense comprises of current and deferred tax. Current tax and deferred tax are recognized in net income except to the extent that it relates to a business combination or items recognized directly in equity or in other comprehensive loss/income.

Current income taxes are recognized for the estimated income taxes payable or receivable on taxable income or loss for the current year and any adjustment to income taxes payable in respect of previous years. Current income taxes are determined using tax rates and tax laws that have been enacted or substantively enacted by the year-end date.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of goodwill and temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting nor taxable profit or loss.

Recognition of deferred tax assets for unused tax losses, tax credits and deductible temporary differences is restricted to those instances where it is probable that future taxable profit will be available against which the deferred tax asset can be utilized. At the end of each reporting year, the Company reassesses unrecognized deferred tax assets. The Company recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

h) Share Capital

Equity instruments are contracts that give a residual interest in the net assets of the Company. Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, preferred shares, share warrants and flow-through shares are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Flow-through Shares

The Company may from time to time issue flow-through common shares to finance a significant portion of its exploration program. Pursuant to the terms of the flow-through share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. On issuance, the Company bifurcates the flow-through share into i) a flow-through share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability, and ii) share capital.

Upon expenditures being incurred, the Company derecognizes the liability and recognizes a deferred tax liability for the amount of tax reduction renounced to the shareholders. The premium is recognized as other income and the related deferred tax is recognized as a tax provision.

Proceeds received from the issuance of flow-through shares are restricted to be used only for Canadian resource property exploration expenditures within a two-year period. The portion of the proceeds received but not yet expended at the end of the Company's reporting year is disclosed separately as flow-through share proceeds.

The Company may also be subject to a Part XII.6 tax on flow-through proceeds renounced under the Look-back Rule, in accordance with Government of Canada flow-through regulations. When applicable, this tax is accrued as a financial expense until paid.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

i) Contributed Surplus

Contributed surplus is used to record the accumulated fair value of stock options recognized as share based payments and warrants issued. Contributed surplus is increased by the fair value of these items on vesting and is reduced by the corresponding amounts when options and warrants are exercised, cancelled or expire.

j) Warrants

The Company accounts for warrants using the fair value method. Under this method, the value of warrants is measured at fair value at the grant date using the Black-Scholes option pricing model, using management's assumptions disclosed in Note 10, and recorded as share capital when the warrants are exercised.

k) Share-based Payments

Where equity-settled share options are awarded to employees, the fair value of the options at the date of grant is charged to the statement of comprehensive loss/income over the vesting period. Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each reporting date so that, ultimately, the cumulative amount recognized over the vesting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to the statement of comprehensive loss/income over the remaining vesting period.

Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognized in comprehensive loss/income over the vesting period, described as the period during which all the vesting conditions are to be satisfied.

Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in the statement of comprehensive loss/income. Options or warrants granted related to the issuance of shares are recorded as a reduction of share capital.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

All equity-settled share-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital, adjusted for any consideration paid.

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense.

l) Loss per Share

The basic loss per share is computed by dividing the net income or loss applicable to common shares of the Company by the weighted average number of common shares outstanding for the relevant year.

The diluted loss per common share is computed by dividing the net income or loss applicable to common shares by the sum of the weighted average number of common shares issued and outstanding and all additional common shares that would have been outstanding, if potentially dilutive instruments were converted.

m) Rehabilitation Provisions

The Company is subject to various government laws and regulations relating to environmental disturbance caused by exploration and evaluation activities. The Company records the present value of the estimated costs of legal and constructive obligations required to restore the explorations sites in the period in which the obligation is incurred. The nature of the rehabilitation activities includes: restoration, reclamation, and revegetation of the affected exploration sites.

The rehabilitation provision generally arises when the environmental disturbance is subject to government laws and regulations. When the liability is recognized, the present value of the estimated costs is capitalized by increasing the carrying amount of the related mining assets. Over time, the discounted liability is increased for the changes in present value based on current market discount rates and liability specific risks.

Additional environment disturbances or changes in rehabilitation costs will be recognized as additions to the corresponding assets and rehabilitation liability in the period in which they occur. As of December 31, 2013, no rehabilitation provision has been recorded.

n) Net Smelters Return (NSR) Royalties

The NSR royalties are generally not be accounted for when acquiring the mining property since they are deemed to be a contingent liability. Royalties are only accounted for when probable and can be measured with sufficient reliability.

3. Summary of Significant Accounting Policies (continued)

o) Segment Disclosures

The Company currently operates in a single segment: the acquisition and exploration of mining properties. All of the Company's activities are conducted in Canada.

p) Application of New and Revised IFRS

IFRS 7 – Financial Instruments : Disclosures, requires additional disclosure requirements in the reporting of transfer transactions and risk exposures relating to transfers of financial assets and the effect of those risks on an entity's financial position, particularly those involving securitization of financial assets. This standard is effective for years beginning on or after January 1, 2013. The adoption of this standard has no impact on the financial statements

IFRS 11 – Joint Arrangements, requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas, for a joint operation, the venturer will recognize its share of the assets, liabilities, revenues and expenses of the joint operation. This standard is effective for annual periods beginning on or after January 1, 2013 The adoption of IFRS 11 has no impact on the financial statements.

IFRS 12 - Disclosure of Interests in Other Entities, establishes disclosure requirements for interests in other entities, such as joint arrangements, equity accounted investments, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities. This standard is effective for annual periods beginning on or after January 1, 2013 The adoption of IFRS 12 has no impact on the financial statements.

IFRS 13 - Fair Value Measurement, is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. This standard is effective for annual periods beginning on or after January 1, 2013. The adoption of IFRS 13 did not require any adjustments to the valuation techniques used by the Company to measure fair value and did not result in any measurement adjustments at that date.

IAS 1 – Presentation of Financial Statements, has been amended to require companies to group items within Other Comprehensive Income (OCI) that may be reclassified to the statement of operations. The amendment also reaffirms existing requirements that items in OCI and statement of operations should be presented as either a single statement or two consecutive statements. The amendments to IAS 1 are effective for fiscal years beginning on or after July 1, 2012. The adoption of IAS 1 has no impact on the financial statements.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

3. Summary of Significant Accounting Policies (continued)

IAS 28 - Investments in Associates and Joint Ventures, was re-issued by the IASB in May 2011. IAS 28 continues to prescribe the accounting for investments in associates but is now the only source of guidance describing the application of the equity method. The amended IAS 28 will be applied by all entities that have an ownership interest with joint control of, or significant influence over, an investee. The amendments to IAS 28 are effective for annual periods beginning on or after January 1, 2013. The adoption of IAS 28 has no impact on the financial statements.

IFRS 20 - Stripping Costs in the Production Phase of a Surface Mine - In October 2011, the IASB issued IFRS 20. IFRIC 20 provides guidance on the accounting for the costs of stripping activity in the production phase of surface mining when two benefits accrue to the entity from the stripping activity: useable ore that can be used to produce inventory and improved access to further quantities of material that will be mined in future periods. IFRIC 20 must be applied starting January 1, 2013. The adoption of IFRIC 20 has no impact on the financial statements.

New and revised IFRSs in issue but not yet effective

IFRS 9 –Financial Instruments - In November 2009, the IASB issued IFRS 9, which will replace IAS 39, “Financial instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, and replaces the multiple category and measurement models in IAS 39. The approach in IFRS 9 focuses on how an entity manages its financial instruments in the context of its business model, as well as the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods currently provided in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2015. The Company is currently evaluating the impact of IFRS 9 on its financial statements.

IAS 32 - Financial Instruments: Presentation, provides clarification on the application of offsetting rules. These amendments are effective for annual periods beginning on or after January 1, 2014. The Company is currently evaluating the impact of IAS 32 on its financial statements.

IAS 36 – Impairment of Assets, requiring disclosure of the recoverable amount of an asset or cash generating unit, and the basis for the determination of fair value less costs of disposal, when an impairment loss is recognized or when an impairment loss is subsequently reversed. This standard is effective for years beginning on or after January 1, 2014. The Company is currently evaluating the impact of IAS 36 on its financial statements.

4. Critical Accounting Estimates and Judgments

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

4. Critical Accounting Estimates and Judgments (continued)

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

Judgments

a) Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the profit or loss in the year the new information becomes available.

b) Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent that it is probable that taxable profit will be available against which a deductible temporary difference can be utilized. This is deemed to be the case when there are sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity which are expected to reverse in the same year as the expected reversal of the deductible temporary difference, or in years into which a tax loss arising from the deferred tax asset can be carried back or forward. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

4. Critical Accounting Estimates and Judgements (continued)

Estimates

c) Title to Mineral Properties

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

d) Useful Lives of Depreciable Assets

The Company reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utilization of the assets. Uncertainties in these estimates relate to technical obsolescence that may change the utilization of certain patents.

e) Share-based Payment Transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the stock option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 10.

f) Provisions and Contingencies

The amount recognized as provision, including legal, contractual, constructive and other exposures or obligations, is the best estimate of the consideration required to settle the related liability, including any related interest charges, taking into account the risks and uncertainties surrounding the obligation. In addition, contingencies will only be resolved when one or more future events occur or fail to occur. Therefore assessment of contingencies inherently involves the exercise of significant judgement and estimates of the outcome of future events. The Company assesses its liabilities and contingencies based upon the best information available, relevant tax laws and other appropriate requirements.

g) Impairment of exploration and evaluation assets

Exploration and evaluation assets shall be assessed for an impairment test when facts and circumstances suggest that their carrying amount may exceed recoverable amount. When facts and circumstances suggest that the carrying amount exceeds the recoverable amount, the Company shall measure, present and disclose any resulting impairment loss. Indications of impairment as well as the evaluation of recoverable amount of exploration and evaluation assets require significant judgment. Management considers various factors including, but are not limited to, financial and human resources available, exploration budgets planned, importance and results of exploration work done previously, industry and economic trends and price of minerals.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

4. Critical Accounting Estimates and Judgements (continued)

h) Valuation of tax credit related to resources and mining tax credit

Tax credit related to resources and mining tax credit for the current and prior periods are measured at the amount expected to be recovered from the taxation authorities using the tax rates and tax laws that have been enacted or substantively enacted at the statement of financial position date. Uncertainties exist with respect to the interpretation of tax regulations for which certain expenditures could be disallowed by the taxation authorities in the calculation of credits, and the amount and timing of their collection.

The calculation of the Company's credits necessarily involves a degree of estimation and judgment in respect of certain items whose tax treatment cannot be finally determined until notice of assessments and payments have been received from the relevant taxation authority. Difference arising between the actual results following final resolution of some of these items and the assumptions made could necessitate adjustments to tax credit related to resources and to mining tax credit, exploration and evaluation assets and income tax expense in future periods.

The amounts recognized in the financial statements are derived from the Company's best estimation and management's judgment as described above. However, the inherent uncertainty regarding the outcome of these items means that eventual resolution could differ from the accounting estimates and therefore have an impact on the Company's financial position and its cash flows.

5. Other receivables

As of December 31, 2013, the Company had other receivables of \$41,562 (December 31, 2012 – \$401,689), as described below:

	December 31, 2013	December 31, 2012
	\$	\$
Sales Taxes recoverable	32,556	259,713
Tax credits and mining duties	9,006	141,976
	41,562	401,689

St-Georges is a junior platinum, palladium, rhodium, copper, cobalt, nickel and carbon graphite explorer with projects in the Province of Quebec, Canada. The Company owns a 100% interest in the Villebon Property in the Abitibi region, which hosts copper, nickel and platinum group elements ("PGEs"). The Company owns a 100% interest in the Julie and Isoukustouc nickel-copper-PGEs projects on the Quebec North Shore. St-Georges also owns a 100% interest in eight North Shore properties that constitute the Manicouagan Constellation, which are being explored for nickel, copper, platinum, palladium and graphite. The Company also has a 50% interest in six properties being explored for graphite with Amseco Exploration; these properties are on Quebec's North Shore near Baie-Comeau. The properties are described in more detail below.

Villebon

The Villebon copper-nickel-PGE property lies within the Abitibi Greenstone Belt of northwestern Quebec, close to the north boundary of the La Vérendrye Provincial Park and the Reserve in Villebon Township, close to Val-d'Or. This property is located less than 2 kilometres east of Highway 117, about 21 kilometres south of the community of Louvicourt and about 45 kilometres southeast of Val-d'Or. The Villebon property consists of 45 claims (December 31, 2012 – 45 claims). Upon commencement of Full Scale Production on these properties, the Royalty Holder becomes eligible to receive 5% of the Net Smelter Returns from St-Georges. The Company shall have the right to purchase 50% of these NSR from the Royalty Holder at any time for a total cash sum of \$2,000,000.

The Company assessed its future plans for the Villebon property and determined that there are indicators of impairment. As a result, the Company has decided to record an impairment charge for its Villebon property in the amount of \$4,397,393 (2012 – (\$Nil)). The impairment charge is based on management's best estimate of fair value less costs to sell and on the determination that insufficient work was being completed on the Villebon property to maintain all of the mining claims.

6. Exploration and Evaluation Assets (continued)

As per the agreement entered into by the Company with Fancamp Resources Inc. and Sheridan Platinum Group Ltd. on February 15, 2009 concerning the purchase of the Villebon Property, the Company agreed to pay an advance royalty payment of \$40,000 per year, beginning in February 2012. These advances will be applied against future royalty payments. As at December 31, 2012, the Company had \$80,000 in advances (2012 – \$40,000) from which an amount of \$80,000 was unpaid at year-end (2012 – \$40,000) and is included in accounts payable and accrued liabilities. Please see Note 15 below for further details in this regard.

Julie – Isoukustouc Complex

The Julie – Isoukustouc Complex properties are both part of the rich Proterozoic Grenville Province of Quebec. Exploration work on these properties will focus on nickel, copper and PGE. These properties are located in the North Shore region of the St. Lawrence River, in proximity to the communities of Baie-Comeau and Sept-Îles. The Manic-3, Mathilda and Isoukustouc properties are located less than 10 kilometres west of the Manic-3 hydro generating station within the Manicouagan reservoir. The Julie–Isoukustouc Complex properties are located approximately 65 kilometres further to the east, close to Lac

The Julie – Isoukustouc Complex properties are composed of 415 claims (December 31, 2012 – 755 claims), of which 203 claims are in the Julie area and 212 are in the Isoukustouc Complex area. Upon exercising the Option of its 100% interest in the Property and upon commencement of Full Scale Production, the Optionor becomes eligible to receive 3% of the Net Smelter Returns from St-Georges. The Company has the right to purchase 1.5% of the NSR from the Optionor at any time, but not later than 12 months from the commencement of industrial exploitation of the properties for a total cash sum of \$3,000,000.

The Company assessed its future plans for the Julie-Isoukustouc Complex properties and determined that there are indicators of impairment. These indicators of impairment are primarily in the Isoukustouc properties and the Company intends to pursue exploration activities in the Julie area. As a result, the Company has decided to record an impairment charge for its Julie-Isoukustouc Complex properties in the amount of \$1,906,273 (2012 – \$Nil). The impairment charge is based on management's best estimate of fair value less costs to sell and on the determination that insufficient work was being completed on the Julie-Isoukustouc Complex properties to maintain all of the mining claims.

6. Exploration and Evaluation Assets (Continued)

Manicouagan Constellation

The Manicouagan Constellation group of properties consists of eight prospective grass roots targets for PGE with limited historical work. Tétépisca is known to host graphite. The remaining seven properties are gold-copper-nickel-PGE projects. The Manicouagan Constellation group of properties are located along Quebec's North Shore region of the St. Lawrence River, in the Manicouagan sector. The Lac en Dentelle property is 65 kilometres northwest of Labrieville and about 200 kilometres from Forestville. The Franquelin property is located about 14 kilometres from Baie-Comeau. The Lac Ste-Anne property is located east of Manicouagan. The Manic-5 property is located in the centre of Manicouagan. The four other properties (Bois-Long, Indian Summer, Katshi and Tétépisca) are located in the northwestern sector of Manicouagan. The Manicouagan Constellation properties are composed of a total of 124 claims (December 31, 2012 – 146 claims). With regards to the Franquelin West properties, upon commencement of Full Scale Production, the Vendors of the Franquelin West properties become eligible to receive 1.0% of the Net Smelter Returns from St-Georges. The Company has the right to purchase 0.5% of these NSR from the Vendors at any time for a total cash sum of \$500,000.

The Company assessed its future plans for the Manicouagan Constellation Complex properties and determined that there are indicators of impairment in essentially all of the prospective targets with the exception of the Franquelin property. As a result, the Company has decided to record an impairment charge for its Manicouagan Constellation Complex properties in the amount of \$492,776 (2012 – \$Nil). The impairment charge is based on management's best estimate of fair value less costs to sell and on the determination that insufficient work was being completed on the Manicouagan Constellation Complex properties to maintain all of the mining claims.

Claims Held Jointly with Amseco Exploration Ltd.

On February 29, 2012, the Company announced that it had partnered with Amseco Exploration Ltd. ("Amseco") to acquire and explore properties known to host multiple graphite occurrences. These claims are divided into two areas. The Tétépisca West, Canadian Goose and Wooden Lake properties (collectively, the "Tétépisca West properties") are all located to the southwest of the Manicouagan Reservoir, close to the Company's Tétépisca property; St-Georges and Amseco jointly have 118 claims on the Tétépisca West properties. In addition, the Pike River, Lake 222 and the Polynesian Lake Graphite properties (collectively, the "Southern properties") are located approximately 120 km northwest of Baie-Comeau, Quebec, close to the Company's Lac Julie properties; St-Georges and Amseco jointly have 67 claims on the Southern properties. St-Georges and Amseco jointly have 185 claims (December 31, 2012 – 185) on the Tétépisca West and Southern properties, which are owned 50-50 by each corporation. The relationship between the two corporations does not constitute a joint venture.

7. Due to a Company Controlled by a Director

On March 9, 2012, the Company signed a non-interest bearing promissory note with a company controlled by a director of the Company for a principal amount of \$50,000, plus \$10,000 in fees. The total amount is due 48 hours following the closing of the Company's next private placement or upon receipt of sales taxes receivable. If the amount is not paid in full within 65 calendar days after the date when such payment is due, then a late charge of 5% applies (refer to Note 17). As at December 31, 2013 the amount owing to the company controlled by a director on this promissory note was \$32,500 (December 31, 2012 - \$50,000).

8. Convertible Debentures

	December 31, 2013	December 31, 2012
	\$	\$
Convertible debenture, unsecured, bearing interest at an annual rate of 6% (effective interest rate of 20%) calculated quarterly. The capital amount of \$ 1,829,000 is due on July 2, 2023 and is convertible any time into common shares. (Please see a) below).	586,994	-
Convertible debenture, unsecured, bearing interest at an annual rate of 6% (effective interest rate of 20%) calculated quarterly. The capital amount of \$ 93,916 is due on October 5, 2023 and is convertible any time into common shares. (Please see b) below).	28,798	-
	<u>615,792</u>	<u>-</u>

- a) On July 3, 2013 the Company issued Convertible Unsecured Debentures in the aggregate amount of \$1,829,000 and entered into Agreements with its suppliers to satisfy more than 90% of its short-term liabilities by conversion of current Accounts Payable to Debentures.

The Debentures bear interest at the annual rate of 6% calculated quarterly in arrears and payable on a pro-rata basis on conversion or at maturity. The Debentures mature on July 2, 2023. At any time before the maturity date the Debentures are convertible at the option of either the holder or the Company into fully paid and non-assessable common shares of the Company subject to certain conditions.

At the date of issuance, the debt component of the Debentures amounted to \$ 535,850, representing the present value of interest and principal repayment until July 2, 2023. The difference between the nominal value and the debt component amounted to \$ 1,293,150 and represents the conversion option, which was recorded in the equity of the Company. Over the term of the convertible debenture, the debt component will be increased to its nominal value of \$ 1,829,000 to provide, for accounting purposes, an actual interest expense equal to 20%, representing the estimated interest rate of similar debt instruments which do not have such an equity component. The debt component amounted to \$ 586,994 on December 31, 2013.

8. Convertible Debentures (Continued)

- b) On October 5, 2013 the Company issued a second tranche of the Convertible Unsecured Debentures in the aggregate amount of \$93,916 and entered into an Agreement with another supplier to convert a current Account Payable to Debentures.

The second tranche of the Debentures bear interest at the annual rate of 6% calculated quarterly in arrears and payable on a pro-rata basis on conversion or at maturity. The Debentures mature on October 5, 2023. At any time before the maturity date the Debentures are convertible at the option of either the holder or the Company into fully paid and non-assessable common shares of the Company subject to certain conditions.

At the date of issuance, the debt component of the second tranche of the Debentures amounted to \$ 27,515, representing the present value of interest and principal repayment until October 5, 2023. The difference between the nominal value and the debt component amounted to \$ 66,401 and represents the conversion option, which was recorded in the equity of the Company. Over the term of the convertible debenture, the debt component will be increased to its nominal value of \$ 93,916 to provide, for accounting purposes, an actual interest expense equal to 20%, representing the estimated interest rate of similar debt instruments which do not have such an equity component. The debt component amounted to \$ 28,798 on December 31, 2013.

9. Share Capital

a) Common Shares

The Company is authorized to issue an unlimited number of common shares, voting, participating and with no par value. The share capital of the Company consists only of fully paid common shares.

The holders of common shares are entitled to receive dividends, which may be declared from time to time, and are entitled to one vote per share at meetings of the Company. All shares are ranked equally with regards to the Company's residual assets.

On April 22, 2013, the Company completed a consolidation of its shares on the basis of one (1) new common share for every six point five (6.5) common shares held. As at December 31, 2012 there were 103,562,111 common shares issued and outstanding on a pre-consolidation basis. There were 15,932,606 common shares issued and outstanding following this consolidation. All figures for common shares, per-share information, warrants and options in these financial statements are presented on a post-consolidation basis.

There was no change in the number of common shares issued from December 31, 2012 to December 31, 2013.

	Number of Shares	Amount (\$)
Balance at December 31, 2012	15,932,606	8,804,832

9. Share Capital (continued)

b) Preferred Shares

The Company is authorized to issue an unlimited number of preferred shares without nominal or par value. As at December 31, 2013, the share capital of the Company does not include any preferred shares.

c) Equity component of Convertible Debentures

During the year, the Company issued convertible debentures including a debt component as described in Note 8. The equity component is shown in the following table:

	<u>Amount (\$)</u>
Balance at January 1, 2012	-
Balance at December 31, 2012	-
Issueance of convertible debentures	1,359,552
Balance at December 31, 2013	<u>1,359,552</u>

d) Contributed Surplus

There was no change in the contributed surplus from January 1, 2013 to December 31, 2013:

	<u>Amount (\$)</u>
Balance at January 1, 2012	<u>1,419,447</u>
Balance at December 31, 2012	<u>1,419,447</u>
Balance at December 31, 2013	<u>1,419,447</u>

e) Warrants

Warrants

The following is a summary of changes in warrants from January 1, 2012 to December 31, 2013:

	Number of Warrants	Weighted Average Exercise Price
Balance as at January 1, 2012	<u>5,494,700</u>	<u>\$3.12</u>
Expired	1,310,444	\$2.80
Balance as at December 31, 2012	<u>4,184,256</u>	<u>\$3.19</u>
Expired	3,231,179	\$3.41
Balance as at December 31, 2013	<u>953,077</u>	<u>\$3.16</u>
Warrants exercisable, December 31, 2013	<u>953,077</u>	<u>\$3.16</u>

9. Share Capital (continued)

As at December 31, 2013, the Company had outstanding warrants as follows:

Number of Warrants	Exercise Price	Weighted average remaining contractual life (years)
796,154	\$3.60	0.16
156,923	\$0.92	1.00
953,077	\$3.16	0.30

10. Share-based Payments

a) Stock Option Plan

On June 1, 2009, the Company established a stock-based compensation plan. Under the stock-based compensation plan, the board of directors of the Company may, from time to time, at its discretion, and in accordance with CNSX requirements, grant to directors, officers and technical consultants of the Company, non-transferable options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed ten percent (10%) of the issued and outstanding common shares exercisable for a period of up to five (5) years from the date of grant. The number of common shares reserved for issuance to any individual director or officer will not exceed five percent (5%) of the issued and outstanding Common Shares and the number of Common Shares reserved for issuance to all technical consultants will not exceed two percent (2%) of the issued and outstanding Common Shares.

Options may be exercised no later than 90 days following cessation of the optionee's position with the Company, provided that if the cessation of office, directorship, or technical consulting arrangement was by reason of death, the option may be exercised with a maximum period of one year after such death, subject to expiry date of such option.

The subscription price of the shares which may be issued under the plan must not be lower than the closing price of the last regular board lot (not less than \$0.10) sold on the CNSX on the trading day immediately preceding the date of grant. The option price is payable in full at the time the options is exercised. The vesting periods in respect of the options are determined by the Board of Directors at the time of each grant of options.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

10. Share-based Payments (continued)

The following options were outstanding and exercisable as at December 31, 2013:

Range of exercise prices	Number outstanding	<u>Options outstanding and exercisable</u>	
		Weighted average remaining contractual life	Weighted average exercise price
\$		Years	\$
1.30	61,538	1.02	1.30
0.98	346,154	1.80	0.98
0.98 - 1.30	407,692	1.68	1.03

In 2013, no options were granted or exercised and 215,384 options were forfeited or expired.

The fair value of stock options issued in 2010 was estimated at the grant date based on the Black-Scholes options pricing model using the following weighted average assumptions:

Share price at grant date	\$0.72 - \$0.98
Exercise price	\$0.98 - \$1.30
Risk-free interest rate	1.92% to 2.81%
Expected life (years)	5
Expected volatility	62% to 65%
Expected dividend yield	Nil

11. Write-off of Secured Debenture

On May 27, 2010, the Company signed a secured debenture for a principal amount of \$100,000 with LiteWave Corp., a related party (refer to Note 17). This secured debenture was to bear interest at the rate of 15% per annum, payable semi-annually and maturing on May 27, 2011. During 2012 LiteWave defaulted on its obligations to repay the principal amount and interest to the Company. Interest on the debenture then increased from 15% per annum to 18% per annum.

Given the financial condition of LiteWave Corp. in 2012, management of the Company took the position that there was a very strong likelihood that the interest would never be received and accordingly wrote off the interest receivable from LiteWave Corp. in its fiscal year ended December 31, 2012.

Management of St-Georges also decided to write off the secured debenture itself during its fiscal year ended December 31, 2012. The Company has a claim to the assets of LiteWave Corp., which consist primarily of mineral property claims and, in the event of liquidation of LiteWave Corp., these mineral property claims would revert to St-Georges. Management estimated the value of these property claims to be \$Nil and decided to write-off of the secured debenture in the total amount of \$100,000 in the fiscal year ended December 31, 2012.

12. Income Taxes

The statutory tax rate in Canada is 26.9% (2012 – 26.9%). The Company's effective tax rate in the year ended December 31, 2013 was 0% (2012 – 0%). A reconciliation of income tax expense applicable to profit from operating activities is as follows:

<u>Federal and provincial</u>	<u>2013</u>	<u>2012</u>
	\$	\$
Net loss before taxes	(7,243,080)	(478,299)
Income taxes at statutory rates	(1,948,389)	(128,662)
Non-deductible expenses	1,826,531	39,376
Taxable tax credit	-	28,569
Other items	-	(4,839)
Current tax losses for which no deferred income tax asset was recognized	121,857	65,556
Income taxes – Future (recovered)	-	-

The Company has non-capital loss carry forwards that expire approximately as follows:

<u>Year of expiry</u>	<u>Canada - Federal and Provincial (\$)</u>
2014	166,520
2015	143,174
2026	99,208
2027	138,868
2028	161,033
2029	469,691
2030	861,816
2031	794,992
2032	350,808
2033	453,001
	3,639,111

13. Financial Risk Management and Financial Instruments

Financial Risk

The primary goals of the Company's financial risk management are to ensure that the outcomes of activities involving elements of risk are consistent with the Company's objectives and risk tolerance, and to maintain an appropriate risk/reward balance while protecting the Company's balance sheet from events that have the potential to materially impair its financial strength. Balancing risk and reward is achieved through aligning risk appetite with business strategy, diversifying risk, pricing appropriately for risk, mitigating risks through preventive controls and transferring risk to third parties.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

13. Financial Risk Management and Financial Instruments (continued)

The Company's exposure to potential loss from financial instruments is primarily due to various market risks, including interest rate, liquidity and credit risk. There has been no change in the financial risk of the Company during the year.

Market Risk

Market risk is the risk of loss arising from adverse changes to market rates and prices, such as interest rates, equity market fluctuations, foreign currency exchanges rates, and other relevant market rate or price changes. Market risk is directly influenced by the volatility and liquidity in the markets in which the related underlying assets are traded. Below is a discussion of the Company's primary market risk exposures and how those exposures are currently managed.

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet cash flow commitments associated with financial instruments. The purpose of liquidity management is to ensure that there is sufficient cash to meet all financial commitments and obligations as they fall due. To manage cash flow requirements, the Company may have to issue additional common shares or conclude private investments.

As at December 31, 2013, the Company has current liabilities and accrued liabilities of \$518,163 due within 12 months and has cash and cash equivalents of \$707 to meet its current obligations. As a result, the Company does face liquidity risk.

Credit Risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. The Company's credit risk is due mainly to its other receivables and its secured debenture with LiteWave.

The Company's statement of financial position is presented net of the allowance for doubtful advances established on a receivable by receivable basis. This amount best represents the Company's maximum exposure to credit risk. The allowance for doubtful advances was established on the basis of an individual appraisal of the advance and an overall appraisal that takes into account the current economic environment. The allowance for doubtful realization of the full value of the secured debenture was established on the appraisal of the debtor LiteWave Corp.'s current financial situation and a targeted financial evaluation of the current fair market value of the exploration mining properties currently owned by that corporation. Regional and sectorial comparative analyses were used to assess the short-term liquidation value of the exploration mining properties owned by LiteWave. In 2012 the Company wrote off the entire amount of \$100,000 of the secured debenture, as described in more detail in Note 7 above.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

13. Financial Risk Management and Financial Instruments (continued)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market-interest rates. The Company's convertible debentures fixes interest at 6% per annum and accordingly is not subject to cash flow interest rate risk due to changes in the market rate of interest. The Company does not use financial derivatives to reduce its exposure to risk. The Company considers its interest rate risk to be minimal.

Fair Value Measurement

Fair value is the amount at which a financial instrument could be exchanged between willing parties, based on current markets for instruments with the same risk, principal and remaining maturity. Fair value estimates are based on present value and other valuation techniques using rates that reflect those that the Company could currently obtain, on the market, for financial instruments with similar terms, conditions and maturities.

The carrying amount and fair value of financial instruments, with the exception of the secured debenture, are considered to be a reasonable approximation of fair value because of their short-term maturities. The secured debenture is presented at its fair value at year-end after the write-off of \$100,000 in 2012.

14. Capital Management

Capital is comprised of the Company's shareholders' equity and any debt that it may issue. As at December 31, 2013, the Company's shareholders' equity was \$294,849 (December 31, 2012 – \$6,178,377) and it had a due to a related party of \$32,500 (December 31, 2012 – \$50,000). The Company's objectives when managing capital are to maintain financial strength and to protect its ability to meet its on-going liabilities, to continue as a going concern, to maintain creditworthiness and to maximize returns for shareholders over the long term. Protecting the ability to pay current and future liabilities includes maintaining capital above minimum regulatory levels, current financial strength rating requirements and internally determined capital guidelines and calculated risk management levels. To meet these objectives, management monitors the Company's capital requirements against unrestricted net working capital and assesses additional capital requirements on specific business opportunities on a case-by-case basis.

The capital for expansion was mostly from proceeds from the issuance of common shares. The net proceeds raised will only be sufficient for a certain amount of exploration and development work on its properties, and for working capital purposes. Additional funds may be required to finance the Company's corporate objectives. There was no change in the Company's capital management policy for the year ended December 31, 2013.

The Company is not exposed to any externally imposed capital requirements, except when the Company issues flow-through shares, for which an amount should be used for exploration work (refer to Note 16).

15. Commitments

Flow-Through Financings

The Company is partially financed through the issuance of flow-through shares. However, there is no guarantee that its expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities would have a negative tax impact for investors.

Moreover, tax rules regarding flow-through placements set deadlines for carrying out the exploration work no later than the first of the following dates:

- Two years following the flow-through placements; and
- One year after the Company has renounced the tax deductions relating to the exploration work.

Commitments to carry out exploration work that are not respected are subject to a combined tax of 30% (Canada and Quebec).

During the year, the Company raised \$Nil (2012 – Nil) in flow-through placements.

Payments to Fancamp Exploration Ltd. and Sheridan Platinum Group

On February 15, 2009, the Company entered into an agreement to purchase claims in the Villebon area of Quebec from Fancamp Exploration Ltd. (“Fancamp”) and Sheridan Platinum Group (“Sheridan”) (collectively, the “Vendors”). St-Georges originally acquired 50% of these claims, with LiteWave acquiring the remaining 50%. Since LiteWave defaulted on its payments of a total of \$100,000 to each of Fancamp and Sheridan (for a total of \$200,000), St-Georges paid these amounts to Fancamp and Sheridan in February 2011 and assumed a 100% interest in these claims.

As per the terms of this agreement with Fancamp and Sheridan, St-Georges is obliged to pay an advance royalty payment of \$40,000 per year to the Vendors, beginning in February 2012. As of December 31, 2013, the liability for this royalty payment is included in the accounts payable in the amount of \$80,000 (December 31, 2012 - \$40,000).

In addition, if the Company were to generate revenues from these claims, a Net Smelter Return of 5% would be paid to the Vendors. The Company has the option to buy back up to 50% of the NSR for a total amount of \$1,000,000.

16. Contingencies

The Company is partly financed by the issuance of flow-through shares however there is no guarantee that the funds spent by the Company will qualify as Canadian exploration expenses even if the Company has committed to take all measures necessary for this purpose. Refusal of certain expenses by tax authorities could have negative tax consequences for investors.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

16. Contingencies (continued)

Moreover, tax rules regarding flow-through placements set deadlines for carrying out the exploration work no later than the first of the following dates:

- Two years following the flow-through placements; and
- One year after the Company has renounced the tax deductions relating to the exploration work.

Commitments to carry out exploration work that are not respected are subject to a combined tax of 30% (Canada and Quebec).

The Company may provide an indemnification to subscribers of flow-through shares in an amount equal to the income tax that would be payable by subscribers in the event, and as a consequence, of the Company not incurring and renouncing qualifying exploration expenses as required under the subscription agreement.

The Company is unable to estimate the liability to be recorded representing the estimated amount payable to indemnify the subscribers for the reduced renunciations.

17. Related Party Transactions

a) LiteWave Corporation

On May 27, 2010, the Company signed a secured debenture with LiteWave Corp. for a principal amount of \$100,000. LiteWave Corp. and the Company are related parties as François Dumas and Mark Billings were directors of both companies until October 2012, when they both resigned as directors of LiteWave Corp. David Grand, a director of the Company, is also president and a director of LiteWave Corp. As this advance was not made in the normal course of business it was measured at the exchange amount. As LiteWave was in default of its obligations to repay the secured debenture to the Company in 2012 both the interest receivable from LiteWave and the secured debenture itself were written off in 2012 as described in more detail in Note 11 above.

b) Management Contracts

During the year, the Company has incurred professional fees amounting to \$ 51,653 (Nil in 2012) with a company controlled by its Chief Financial Officer. In relation with these transactions, \$ 21,600 was payable as at December 31, 2013. This amount is included in accounts payable and accrued liabilities.

During the year, the Company has incurred professional fees amounting to \$ 34,096 (Nil in 2012) with a director of the company. In relation with these transactions, \$ 34,096 was payable as at December 31, 2013. This amount is included in accounts payable and accrued liabilities.

St-Georges Platinum & Base Metals Ltd.

Notes to Financial Statements

For the years ended December 31, 2013 and 2012

(Audited)

17. Related Party Transactions (continued)

In 2011, the Company signed a management contract with François Dumas, the then President and CEO of the Company. As per the terms of this contract, Mr. Dumas was paid a monthly fee of \$7,000 until June 30, 2012 at which date he renounced this monthly fee. Mr. Dumas was paid fees of \$Nil in 2013 (2012 – \$42,000 plus applicable taxes). At December 31, 2013 Mr. Dumas was owed \$Nil as an account payable under the terms of the management contract (December 31, 2012 - \$126,000 plus applicable taxes).

In 2011, the Company signed a management contract with a company controlled by Mark Billings, the then CFO of the Company. Mr. Billings' company was paid a monthly fee of \$5,000 until June 30, 2012 when it renounced its monthly fee. Mr. Billings' company was paid fees of \$Nil in 2013 (2012 – \$30,000 plus applicable taxes). At December 31, 2013 Mr. Billings' company was owed \$Nil as an account payable under the terms of the management contract (December 31, 2012 – \$90,000 plus applicable taxes).

c) Due to a Company Controlled by a Director

On March 9, 2012, the Company signed a promissory note with a company controlled by a director of the Company for a principal amount of \$50,000. The Company agrees to repay the principal of \$50,000 and fees of \$10,000 following the closing of a private placement or upon receipt of sales taxes receivable, as described above in Note 8 above.

d) St-Georges Family Trust

On October 5, 2013, following the final payment related to the 2007 initial acquisition of Julie and Isoukustouc properties, the St-Georges Family Trust (of which François Dumas, a Director of the Company, is one of the Trustees) became eligible to receive a perpetual production royalty of 1.5% of the Net Smelter Returns from these properties. The Company has the option to purchase 0.5% of these NSR within 12 months of commencement of industrial exploitation of the properties for an amount of \$500,000.

As exploration of these properties is ongoing, there is currently no industrial exploitation.

18. Loss per Share

The calculation of basic loss per share is based on the loss for the period divided by the weighted average number of shares in issue during the period. In calculating the diluted loss per share, potential ordinary shares such as share options, warrants and convertible debentures have not been included as they would have the effect of decreasing the loss per share. Decreasing the loss per share would be antidilutive. Details of share options, warrants and broker warrants in issue that could potentially dilute earnings per share in the future are given in Note 10.

Diluted	(0.456)	(0.030)

19. Restatement of prior year

- (I) On March 28, 2007 St-Georges Minerals Ltd. acquired perpetual Options for Julie and Isoukustouc properties on the Quebec North Shore. These perpetual Options were subsequently acquired by the Company which assumed the rights and obligations of the Option Agreement including an obligation to pay a final amount of \$75,000 to the Optionors up to 6 years after the date of the Agreement.

The Company has determined that the Julie and Isoukustouc properties assets were understated during 2009 by \$75,000. As a result, the 2012 account payables and the exploration and evaluation assets were increased by this amount.

- (II) During the year ended December 31, 2010 the Company entered into an agreement with a consultant to provide services to St-Georges on a monthly basis. The company discovered subsequently that the consultant was involved in legal proceedings and signed an addendum to the initial agreement with the consultant whereby the Company would not be bound to pay for these services until the legal proceedings reached a specified conclusion.

In March 2013, the Company received satisfactory evidence of the specified conclusion of the legal proceedings and agreed to pay for the services rendered by the consultant since 2010. Thus, the Company recognized an expense and a liability of a total of \$66,635 in 2013. However, the Company determined that the 2010 financial statements should have included disclosure regarding this contingent liability for this agreement.

20. Events after the Reporting Date

Acquisition of Mining Properties

On February 5, 2014, the Company entered into a binding agreement with Mining Properties Corp. BVI (the vendor) to acquire 100% of two mineral mining projects in the Kasempa and Mwinilunga Districts in Western Zambia. Terms of the Agreement are as follows:

The parties have agreed to a 90-day due diligence period following which, if successful, the Company agreed to make the following payments to the vendor:

- Issue an initial payment by way of a \$400,000 CAD Convertible debenture with 5% capitalized interest, maturing in 10 years with a floor price of \$0.15. The conversion will be possible after a 4-month hold at 20% discount of volume-weighted average price of the 10 previous trading days prior to written request to convert or at its minimum conversion floor price of \$0.15
- Issue a \$800,000 CAD Convertible Debenture under the same terms than the initial payment 6 months after the initial issuance.
- Issue a \$148,800,000 CAD 15 years convertible debenture, bearing a 5% accrued interest to be paid through proceeds of production of ore or conversion upon default or when acceptable based on the terms with a ratio limit of a maximum of 19,9% of all the issued and outstanding shares of the Company at any given time. A mandatory reimbursement percentage ratio should be in the final agreement in order to accelerate the reimbursement when certain production milestones are met. This debenture will be issued within 10 days following the completion of the due diligence by St-Georges and the transfer of all titles.

Royalties

Upon exercising the Option to its 100% interest in the Property and upon commencement of Full Scale Production, St-Georges will be subject to a 1% NSR interest in favour of the Optionor. The Company shall have the right to purchase at any time from the Optionor 1% of the NSR for a total cash sum of US\$1,500,000.

Finder's Fee

A finder's fee equivalent to a total of \$300,000 CAD will be paid to IFXBG Ltd of Madrid Spain and Mr. Robert Russell of Johannesburg, South Africa. \$200,000 will be paid in shares of St-Georges within 10 days of the closing date at the then market value with \$0.10 as the minimum floor price and \$100,000 at the earliest convenience following the closing date.

Listing on the Deutsche Börse in Frankfurt

On February 10, 2014 the Company's stock commenced trading on the Deutsche Börse in Frankfurt (FSE) under the symbol 85G1 and the Company advised that its shares are no longer available for trading on the Berlin Stock Exchange.

20. Events after the Reporting Date (continued)

Advance from a Director

On February 21, 2014 St-Georges issued a promissory note in the amount of \$200,000 maturing on February 21, 2019 in favour of a Director of the Company. Under the terms of the Promissory Note the Director will provide financing to the Company in a series of scheduled payments between February 21, 2014 and March 30, 2015.

Interest on the Promissory Note is calculated at 18% per annum of which 12% is payable in cash or shares and 6% is payable in shares.

The Company has the right to repay the financing under the Promissory Note at any time.

Issuance of Stock Options

On April 3, 2014, subject to the terms and conditions of its Stock Option Plan (refer to Note 10), St-Georges granted 1,125,000 stock options exercisable at a price of \$0.20 per share before April 3, 2019.

Officers of the Company were granted an aggregate of 775,000 stock options and members of the Board of Directors were granted an aggregate of 350,000 stock options.

The Company also confirmed the expiry of 100,000 stock options issued in 2010 resulting in a total of 1,432,692 options outstanding as of April 3, 2014.

The following options were outstanding and exercisable as at April 3, 2014:

<u>Options outstanding and exercisable</u>			
Range of exercise prices	Number outstanding	Weighted average remaining contractual life	Weighted average exercise price
\$		Years	\$
0.98	307,692	1.55	0.98
0.20	1,125,000	5.00	0.20

(Audited)

20. Events after the Reporting Date (continued)

The fair value of stock options issued on April 3, 2014 of a total fair value of \$130,340 was estimated at the grant date based on the Black-Scholes options pricing model using the following assumptions:

Share price at grant date	\$0.11
Exercise price	\$0.20
Risk-free interest rate	1.789%
Expected life (years)	5
Expected volatility	200%
Expected dividend yield	Nil

Conditional Purchase Agreement

On April 14, 2014 the Company entered into a 5 year Conditional Agreement with Copper Dynasty Corporation and Zhongda Power Fuel Co. Ltd. of Hong Kong, China for the delivery of copper concentrate expected to originate from the mining properties in Western Zambia which St-Georges acquired on February 5, 2014 (See Acquisition of Mining Properties above in Note 20).

The Agreement is based on the delivery of 20,000 metric tonnes per month of copper concentrate, expected to be of 25% concentrate grade, at an agreed price of London Metal Exchange "LME" copper metal pricing less 50%. The Company will be allowed to suspend delivery at its discretion if the LME price for copper reaches \$2.25 USD per pound or lower. An additional commodity brokerage fee of 2% of the net profits will be returned to Copper Dynasty Corp.

As part of the Agreement a bulk calibration order of 200 metric tonnes should be delivered by St-Georges to the designated shipping port of Durban, South Africa within 60 days of signing the contract or within 30 days of closing acquisition of the Western Zambian projects.

Engagement of Service Providers for the Company's Awareness Campaign and Communications Services

- a) On February 14, 2014 the Company concluded an Online Marketing Agreement with Agora Internet Relations Corp. whereby Agora will provide advertizing services to the Company for an amount of \$50,000 plus applicable taxes.

Under the terms of the Agreement, Agora will be paid quarterly instalments of \$12,500 plus applicable taxes through the issuance of common shares starting from February 28, 2014 at a conversion price of \$0.10 per share for the first three quarters and \$0.15 per share for the final payment due on January 30, 2015.

(Audited)

20. Events after the Reporting Date (continued)

- b) On March 7, 2014 the Company engaged the services of Momentum PR to provide communications services and support to the Company's Awareness Campaign.

Under the terms of the Agreement with Momentum, the Company will pay \$42,000 in either cash or shares in two equal instalments. If paid by shares the conversion rates are set at the closing market price on May 5, 2014 subject to a minimum conversion price of \$0.10 per share and the closing market price on October 5, 2014 subject to a minimum conversion price of \$0.20 per share.

- c) On March 19, 2014 the Company signed an Agreement with Capital Libre whereby Capital Libre will provide consulting services to St-Georges and assist in raising investment capital for the Company.

Under the terms of the Agreement, Capital Libre will be paid \$6,500 in two equal instalments on March 31, 2014 and May 15, 2014. Capital Libre will also be eligible to receive a performance based payment in common shares of the Company on achieving pre-established milestones. The performance-based payment will be 8% of the gross proceeds of financings if no intermediaries are involved in a transaction and 2% if intermediaries are involved.

- d) On April 1, 2014, the Company concluded a one-year Agreement with National Media Associates whereby National Media will conduct a media awareness campaign and offer communication and consulting services to St-Georges.

The Agreement is in the amount of \$6,500 per month plus pre-approved expenses which are subject to a ceiling of \$10,000 per month. Payment can be made quarterly by St-Georges in cash or shares starting on June 30, 2014. If National Media is paid by shares the agreed conversion price is \$0.15 cents per share on June 30, 2014 and September 30, 2014, \$0.20 per share on December 31, 2014 and \$0.25 per share on March 31, 2015.

Conversion of Debentures

Following the year end \$1,219,916 of Convertible Debentures (refer to Note 8) plus accumulated interest were converted into 12,516,055 common shares of the Company. As of April 23, 2014, St-Georges had 28,448,661 common shares outstanding and \$703,000 in Convertible Debentures outstanding.
